ABOUT US

Right Detail, Right Product, Right Material.

Büke Group began operations in 1993 in roof and facade cladding, insulation and steel construction. Since its founding, it has delivered over 5 million m^2 of projects worldwide.

Our core fields are waterproofing, thermal and acoustic insulation, standing seam metal roofing, sandwich panels, steel construction, trapezoidal sheet cladding, membrane applications, shingle and metal tile roofing, epoxy coatings, cladding in copper, zinc and other metals, and green roof applications.

We aim to transform new and existing buildings, listed and unlisted, through a modern design approach, with the goal of placing them at the service of the public and those who need them. We work in full coordination across all disciplines using CAD and 3D modelling tools.

With our experienced architects, engineers and draughtsmen, we deliver the right solutions at every stage, from preliminary design, detail drawings and shop drawings through to as-built documentation. Our technical team can prepare projects to US Army Corps of Engineers (USACE) A/E/C standards.

Site works are carried out by GYS İnşaat, which joined the group in 2011, while our renovation, restoration and turnkey projects in Europe are delivered through Büke Construction, established in Croatia.

On every project, we propose the most suitable, most economical and most durable system, and we deliver it. We are proud that our name is associated with quality and trust, and with our internationally experienced team, we add to our world-class applications every day.

WHERE WE WORK

Over 5,000,000 m² Installed Around the World

Completed and ongoing projects in 15 countries, from Europe to Central Asia and from North Africa to the Gulf.

Türkiye	Beştepe, TAF Headquarters, Esenboğa, İzmir
TRNC	Presidential Complex, Mosque
Hungary	NATO Pápa Air Base hangars
N. Macedonia	Skopje Airport
Tunisia	Enfidha Airport
Russia	Pulkovo Airport, Gazprom Business Centre
Georgia	Tbilisi International Airport
Azerbaijan	Coca-Cola Plant, Baku
Iraq	1008 Housing Units
Turkmenistan	Ruhiyat Palace
Uzbekistan	Sarbast Plus, Nestlé, Coca-Cola
Kazakhstan	Almaty Logistics Park, Ramstore
Afghanistan	Mazar-e-Sharif Airport
UAE	New York University Abu Dhabi
Oman	Muscat International Airport

OUR SERVICES

Design to Installation, from One Source

From roof and facade cladding to insulation, and from steel construction to engineering and design, every stage is delivered by the same team to the same standard of quality.

01

Roof & Facade Cladding

- Titanium zinc, copper and aluminium standing seam systems
- BEMO clip-fixed standing seam systems
- Trapezoidal, coated and flat sheet cladding
- Rockwool / PU-core sandwich panels
- Sinusoidal and cassette facade systems
- Metal tile and shingle roofing
- Lead cladding, rainwater gutters
- Roof maintenance and repair

02

Waterproofing & Membranes

- Bituminous membrane applications
- PVC, TPO, FPO and EPDM membrane roofs
- Geomembrane applications
- Liquid membranes, construction chemicals
- Epoxy coatings
- Terrace roofs and wet areas
- Foundation and retaining wall waterproofing
- Green roof applications

03

Thermal & Acoustic Insulation

- Rockwool and glass wool applications
- Polyurethane insulation
- XPS extruded board applications
- EPS (expanded polystyrene) insulation
- External wall insulation (ETICS)
- Acoustic insulation applications

04

Steel Construction

- Steel structure fabrication and erection
- Space-frame roof systems
- Car park canopies and grandstand roofs
- Profile railing fabrication

05

Engineering & Design

- Preliminary design studies
- Detail and shop drawings
- As-built documentation
- CAD and 3D modelling, visualisation
- Design to US Army Corps of Engineers (USACE) A/E/C standards
- Full cross-discipline coordination

APPLICATION SYSTEMS

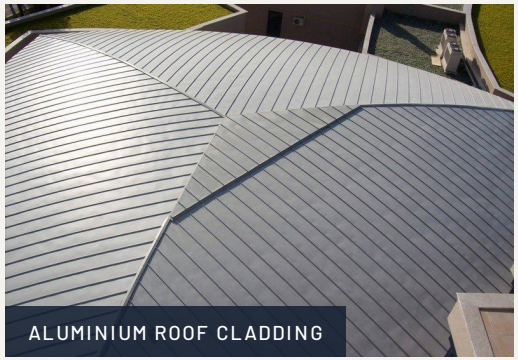

Examples from Site

The principal systems we install, from standing seam metal roofs to membrane roofs, and from foundation waterproofing to external wall insulation.

METAL ROOF CLADDING

TRAPEZOIDAL SHEET CLADDING

SANDWICH STANDING SEAM

ALUMINIUM ROOF CLADDING

LEAD ROOF CLADDING

SHINGLE ROOFING

BITUMINOUS MEMBRANE

TPO / PVC MEMBRANE

TERRACE ROOF APPLICATIONS

FOUNDATION WATERPROOFING

POLYURETHANE INSULATION

EXTERNAL WALL INSULATION

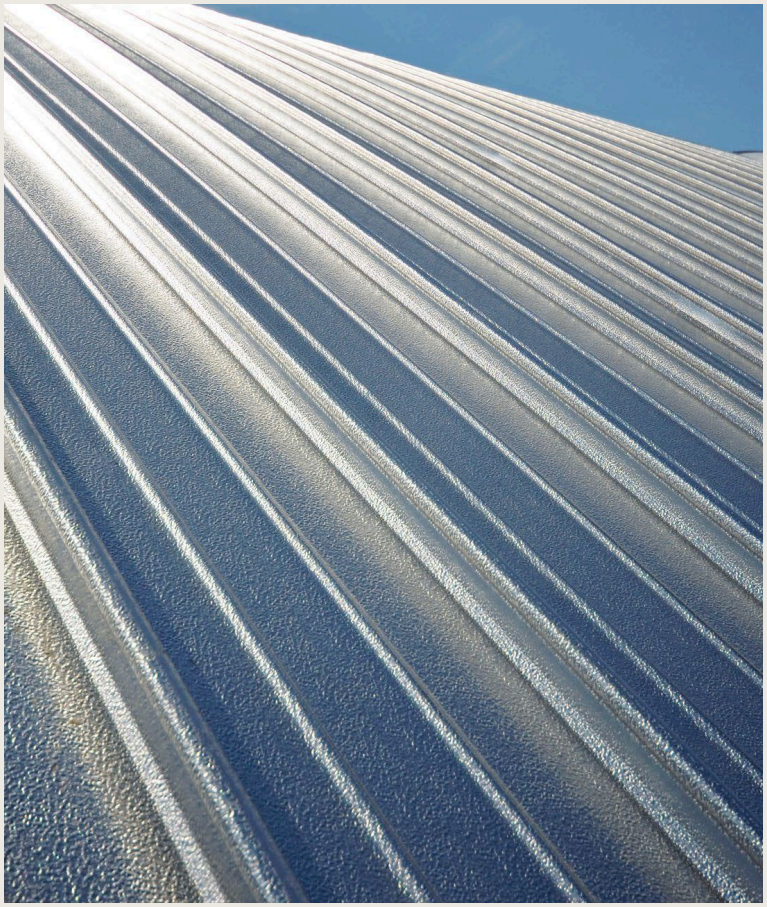

OUR SPECIALISM

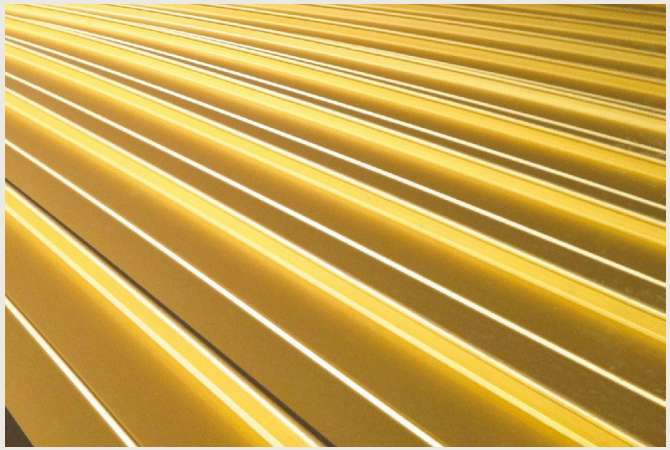

Standing Seam Metal Roof Systems

Titanium zinc, aluminium and copper standing seam systems, together with BEMO clip-fixed standing seam systems, are the roofing solutions we install most often, from public buildings to airport terminals. With the right detailing and the right choice of material, we achieve long-lasting, low-maintenance roofs.

AIRPORT AND HANGAR ROOFS CLAD WITH STANDING SEAM SYSTEMS

Pulkovo Airport, St. Petersburg	45,000 m²
Sabiha Gökçen Airport, İstanbul	44,000 m²
Esenboğa Airport, Ankara	43,000 m²
Enfidha Airport, Tunisia	26,000 m²
Skopje Airport, N. Macedonia	24,000 m²
NATO Pápa Air Base, Hungary	23,000 m²
Tbilisi Airport, Georgia	12,000 m²
Muscat Airport, Oman	8,000 m²

OUR APPROACH TO QUALITY

Modern Buildings, Long-Lasting Applications

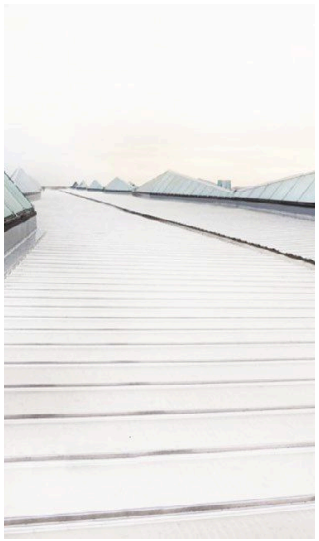

01 **Right detail, right material, right application.**

02 **Quality products, meticulous workmanship, professional work.**

03 **Best product, best solution, best application.**

On every project, we propose the most suitable, most economical and most durable system, and our experienced, dedicated team installs it meticulously. We see every project we complete as a step towards a future shaped by modern buildings.

OCCUPATIONAL HEALTH AND SAFETY

Our OHS Policy

01 To protect every member of staff working on the project

02 To reduce occupational health and safety risks to a minimum

03 To control the negative effects and risks relating to occupational health and safety

04 To measure and improve occupational health and safety performance

05 To inform and raise the awareness of all our employees on occupational health and safety
